Permlight Announces Underwriters Laboratories as its Vendor of the Year

TUSTIN, Calif. – Permlight Products has awarded Underwriters Laboratories Inc. (www.UL.com) its Vendor of the Year Award for 2005. UL performs safety testing on all Permlight LED signage and LED residential lighting products. Properly installed UL Listed Permlight products comply with appropriate requirements in the National Electric Code®.

“Permlight has been leading the charge to introduce LED lighting products for residential applications and is doing so with special attention to safety,” commented Manuel Lynch, president and CEO of Permlight Products. “UL has become a valuable partner of our company in that they provide safety testing without substantially increasing the cost of our products. We are paving some new ground in introducing LEDs into a world dominated classically by incandescent and fluorescent and UL has become a great aide in navigating these new areas.”

Permlight is the first company to introduce a recessed (high hat) LED can light, to have it UL Classified, and to ship into the production home building market.

"UL is pleased to be Permlight's Vendor of the Year for 2005 and commends their strong commitment to product safety. Obtaining the UL Mark is an achievement. Permlight's recognition and appreciation of our thoroughness and level of expertise is a testament to both our customer service and technical excellence," said Keith Williams, president and CEO of UL.

"Our relationship with Permlight is based on shared goals and mutual collaboration. Working with cutting-edge technologies, we are both interested in delivering safe products to market in a timely fashion," said Eli Puszkas, general manager of UL's lighting business. "Our positive working relationship with Permlight allows us to do just that."

Permlight is also working with UL to explore opportunities to extend its portfolio. Adding performance-based testing services to help demonstrate LED systems' compliance with California's Title 24 Energy Codes and the new requirements of Title 22 hazardous waste disposal will provide home builders in these markets with additional project options. Title 22 imposes fines and prison time for the improper disposal of fluorescent lights.

About Permlight

Permlight, a premier provider of energy efficient LED lighting solutions, designs and manufactures LED Lighting Systems and power supplies for residential, theater and performing arts, marinas and boating, and signage. Founded in 1995, Permlight has the longest track record of supplying cost effective LED lighting systems that provide high brightness, low energy, long lifetime, and low maintenance. Permlight's patented dispensing and peel and stick installation systems also make it the easiest system to install.
